

This paper provides a sample of a \LaTeX document for the NIME conference series. It conforms, somewhat loosely, to the formatting guidelines for ACM SIG Proceedings. It is an *alternate* style which produces a *tighter-looking* paper and was designed in response to concerns expressed, by authors, over page-budgets. It complements the document *Author's (Alternate) Guide to Preparing ACM SIG Proceedings Using $\text{\LaTeX}2_{\epsilon}$ and BibTeX*. This source file has been written with the intention of being compiled under $\text{\LaTeX}2_{\epsilon}$ and BibTeX.

To make best use of this sample document, run it through \LaTeX and BibTeX, and compare this source code with your compiled PDF file. A compiled PDF version is available to help you with the ‘look and feel.’ **The paper submitted to the NIME conference must be stored in an A4-sized PDF file, so North Americans should take care not to inadvertently generate letter paper-sized PDF files.** This paper template should prevent that from happening if the `pdflatex` program is used to generate the PDF file.

The abstract should preferably be between 100 and 200 words.

NIME, proceedings, \LaTeX , template

•Applied computing → Sound and music computing; Performing arts; •Information systems → *Music retrieval*;

Please read the comments starting on line 140 of the `nime-template.tex` file to see how to create the CCS Concept Classifications!
